SKILLS

- Scripting & Programming
- DevOps & Cloud
- Android development
- Docker & Kubernetes

LANGUAGES

- English

ABOUT ME

I am a dedicated 2nd-year ICT undergraduate at the Faculty of Technological Studies, University of Vavuniya, with a strong interest in software development and modern technology. I have hands-on experience in Android application development using Flutter, Dart, Java, and Kotlin, along with backend technologies such as Python, Django, FastAPI, Node.js, and REST APIs. I am also developing my skills in Linux, DevOps, Docker, and Kubernetes, with a growing interest in cloud and network security. I enjoy building practical, scalable applications and continuously learning new technologies to strengthen my software engineering skills.

WORK EXPERIENCE

Freelance Application Developer 2023–2016

- Developed mobile and web applications based on client requirements.
- Built Android applications using Flutter, Dart, Java, and Kotlin.
- Worked on UI/UX implementation, backend integration, REST APIs, databases, and application deployment.
- Used Git and GitHub for version control and project management.

Freelance DevOps Engineer 2025–2026

- Worked with Linux-based development and server environments.
- Practiced CI/CD, Docker, and application deployment workflows.
- Gained hands-on experience with Kubernetes and container orchestration.
- Worked with cloud and server configuration, monitoring, and basic infrastructure automation.

EDUCATION

2022
