PROFESSIONAL SUMMARY

Passionate and detail-oriented Undergraduate ICT Student at the Faculty of Technological Studies, University of Vavuniya. Strong foundation in System Analysis and Design (SAD), object-oriented programming, web technologies, and database architecture. Proven track record of designing scalable web systems and applying UML modeling techniques to solve real-world problems. Eager to leverage technical skills in a Software Engineering or Full-Stack Web Development internship.

EDUCATION

BSc (Hons) in Information & Communication Technology

2023 – Present

Faculty of Technological Studies, University of Vavuniya

Vavuniya, Sri Lanka

- **Relevant Coursework:** System Analysis & Design (SAD), Data Structures & Algorithms, Database Management Systems, Web Application Development, Object-Oriented Software Engineering, Computer Networks.
- **Academic Distinction:** Dean's List for Academic Excellence (Semester 1 & 2). GPA: 3.82 / 4.00.

TECHNICAL & SOFT SKILLS

Programming Languages:	JavaScript (ES6+), Python, Java, HTML5, CSS3, SQL
Frameworks & Tools:	React.js, Node.js, Express, Vite, Tailwind CSS, Git, GitHub
SAD & Modeling:	UML (Use-Case, Activity, Sequence, ERD), Wireframing, Agile Scrum, System Requirements
Database Systems:	MySQL, PostgreSQL, MongoDB
Professional Skills:	Analytical Thinking, Technical Documentation, Team Leadership, Problem Solving

KEY PROJECTS

AgriConnect – Smart Agriculture Supply Chain Platform | *HTML5, CSS3, JavaScript, Node.js, MySQL*

- **Problem:** Inefficient supply chain communication between Northern Province local farmers and regional produce buyers.
- **Role & SAD Modeling:** System Analyst & Lead Frontend Developer. Authored UML Use-Case diagrams, activity diagrams, and user persona specs.
- **Impact:** Reduced order matching latency by 40% and provided real-time market crop pricing widgets.

VavuCampus – University Resource & Course Portal | *React.js, Vite, Express, PostgreSQL*

- **Problem:** Fragmented distribution of lecture materials and timetable schedules across department student bodies.
- **Role:** Full-Stack Developer. Designed responsive dashboard, timetable conflict checker, and material repository.
- **Impact:** Adopted by 250+ ICT students for instant academic announcement tracking and lecture resource access.

Medit – Tele-Health & Appointment Management System | *JavaScript, HTML5, CSS, Aurora, LocalStorage*

- **Problem:** Long queue times for outpatient consultations in regional healthcare units.
- **Role:** UI/UX Designer & Developer. Conducted requirements specification (FR/NFR) and developed responsive appointment booking interface.
- **Impact:** Streamlined doctor slot selection with automated form validation and appointment confirmation toasts.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Executive Committee Member | ICT Student Circle, University of Vavuniya

2024 – Present

- Co-organized annual departmental Tech Hackathon, managing workshop scheduling and technical support for 120+ participants.
- Conducted peer tutoring workshops on Git/GitHub version control and HTML/CSS responsive web development.

Participant & Finalist | National University Hackathon 2024

- Developed a functional mobile-responsive web prototype within 24 hours under the Smart Cities track.

CERTIFICATIONS & DECLARATIONS

- **Web Development Specialization:** Meta Front-End Developer Certificate (Coursera).
- **System Analysis Certification:** Agile Software Development & Requirements Engineering (LinkedIn Learning).
- **Declaration:** I hereby certify that the information provided in this CV is accurate and authentic.
